

KANWER ABDULL RAHMAN

+ (92) 305-4418-833 @ kanwarabdullrahman@gmail.com LinkedIn Portfolio Lahore, Pakistan

SUMMARY

Computer Science graduate with full-stack engineering experience (MERN, Next.js, Python production deployments) and hands-on projects in RAG pipelines, MCP tooling, and autonomous AI agents. Comfortable working across the stack from frontend architecture to integrating LLM-powered retrieval and automation systems.

EXPERIENCE

Software Development Intern

DevBeez 07/2025 - 10/2025 Jhelum, Pakistan

- Projects
- FitLynq (Sports Booking Platform):**
https://fitlynq.com/
Built scalable, reusable frontend components (React 19), architecting the app's core structure. Integrated backend API endpoints for court discovery, lobby creation, and multi-player sessions. Connected Stripe and PayPal APIs with setup intents and automated payment capture.
 - ConsoleVault:**
http://consolevault.co.za/
Built a full-stack e-commerce platform (Next.js, Prisma/PostgreSQL) with an admin dashboard for inventory and orders. Integrated PayFast with IPN webhook and signature validation for secure, automated order fulfillment. Automated inventory release, PDF invoicing, and email confirmations via cron jobs.

PROJECTS

Acadpath.app (FYP Coordination System)

- https://acadpath.app/
- Integrated an AI chatbot for real-time guidance on project milestones and queries.
 - Built a dashboard for milestone tracking, document submission, and progress evaluation.
 - Automated group formation and supervisor allocation with role-based access control.

Personal AI ops assistant

- https://github.com/kanwar-mana/acadepath-chatbot
- Architected an end-to-end AI system combining RAG retrieval, MCP tooling, and agent reasoning
 - Connected an autonomous agent to n8n workflows to trigger real-world actions like emails and Slack posts
 - Delivered a portfolio-ready project spanning retrieval, protocol integration, and automation

Outreach Pipeline

- https://github.com/kanwar-mana/emailoutreach/
- Automated B2B lead pipeline: Dockerized Node.js scraper with Outscraper enrichment and Hunter.io validation
 - SMTP rotation engine: 20+ mailboxes with rate-limiting and auto-suspend on bounce detection
 - Async lead queue: Supabase/PostgreSQL processing thousands of leads with zero manual intervention

AI Agent Automation Pipeline (n8n + MCP)

- https://github.com/kanwar-mana/agent-automation-pipeline
- Connected an n8n AI Agent node to a self-built MCP server, exposing custom functions as callable tools for the agent.
 - Enabled end-to-end automated tool calls triggered via both chat messages and webhooks.
 - Demonstrated integration between AI protocol layers (MCP) and no-code automation platforms, bridging structured tool use with workflow orchestration.

EDUCATION

Bachelor of Science in Computer Science

University of Engineering and Technology, Taxila (UET)
09/2022 - 07/2026 Taxila, Pakistan

SKILLS

JavaScript	React	Python	
Next.js	Express.js	HTML	CSS
Redux Toolkit	MCP	n8n	
Node.js	Tailwind	Ai Agents	
Git/GitHub	TypeScript	MongoDB	
SQL			

CERTIFICATIONS

Programming with JavaScript Meta

Google AI Essentials Google

Version Control Meta

STRENGTHS

Team Leadership
Effective in team leadership and facilitating smooth collaboration among team members

KEY ACHIEVEMENTS

AI-Driven Platform for FYP Coordination
Successfully built a web-based application automating the Final Year Project workflow, enhancing experience for students and coordinators
